

Nagy's Prompt, Four Models

Testing AI image generators on a 3-panel portrait

Made with GAMMA

Nano Banana

Clean and realistic with a consistent outfit and background, but the head is cropped out of the full-body panels.

Made with GAMMA

Seedream 4.5

Great portrait detail, but a clear failure in the full-body views: the front view is a floating shirt and jeans with no head or arms.

Made with GAMMA

Seedream 5 Pro

Rich textures and realistic detail, with vintage-style Converse. The head is cropped in the full-body panels and the shoes drift slightly from the brief.

Made with GAMMA

ChatGPT

The most complete result. Full head and body in both views, even lighting, and closest to the brief, with slightly less cinematic detail.
